

**Study:** Why Evolution is NOT a Viable Theory

**Macro-evolution contradicts the Law of Causality**

*(cause and effect)*

**Macro-evolution contradicts the 1<sup>st</sup> Law of Thermodynamics**

*(total energy in the universe is a constant; natural processes neither create nor destroy energy)*

**Macro-evolution contradicts the 2<sup>nd</sup> Law of Thermodynamics**

*(usable energy in a closed system declines such that the system moves from order to disorder)*

**Macro-evolution contradicts the Law of Biogenesis**

*(living organisms develop only from other living organisms and not from non-living matter)*

**Macro-evolution is NOT mathematically possible**

*(the probability of life arising by mere chance is so astronomically high that in effect it is zero)*

**Macro-evolution is NOT compatible with the Science of Information**

*(material evolution is rendered utterly impossible by the existence of non-material information we now know exists in the DNA molecule)*

**Macro-evolution CANNOT overcome the problem of Irreducible Complexity**

*(any system of interdependent parts cannot function unless the minimum of all necessary parts are present at the same time)*

**Macro-evolution has no support from the fossil record**

*(no true transitional forms exist in the fossil record)*

**Macro-evolution is based upon dating methods containing unproven assumptions**

*(No scientist has ever proved the earth to be millions of years old)*

**Macro-evolution CANNOT account for human language**

*(Einstein could identify no means by which matter could bestow meaning to symbols)*
